PRIMARY EXAMINER

DETAILED ACTION

1. Claims 1 – 8, 32 – 39 and 40 – 43 are pending in this Office action.
2. Claims 9 – 31 were previously withdrawn.
3. Canceling claims 9 – 31 and 40 – 43.

Election/Restrictions

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 – 8 and 32 – 39, drawn to a data store and a list generation system that receives a seed item, analyzes descriptive metadata associated with the seed item and/or the user items, and matches the seed item(s) to a subset of the user items, classified in class 707, subclass 102.
 - II. Claims 40 – 43, drawn to generating a fingerprint of a media object and translating the output into a similarity value, classified in class 707, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

Inventions as listed in Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group II and Group I has separate utility such as follow:

Group I teaches a list generation system that receives a seed item, analyzes descriptive metadata associated with the seed item and/or the user items, and matches the seed item(s) to a subset of the user items while Group II teaches generating a fingerprint of a media object, comparing the fingerprint to a reference fingerprint to produce an output and translating the output into a similarity value.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

During a telephone conversation with Himanshu S. Amin, a provisional election was made without traverse to prosecute the invention of Group I, claims 1 – 8 and 32 – 39. Affirmation of this election must be made by applicant in replying to this Office action. Claims 40 – 43 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

See MPEP § 806.05(d).

EXAMINER'S AMENDMENT

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Himanshu S. Amin, Reg. No. 40,894 on 16 September 2005.

The application has been amended as follows:

In the claim:

Please cancel claims 9 – 31 and 40 – 43.

Please amend claims 33, 38 and 39 as follow:

In claim 33, line 1, after "A" and before "method", please insert "computer implemented".

In claim 38, second line, after computer-readable and before media, please insert "storage" .

Please replace claim 39 with new amended claim 39.

39. A data packet stored on a storage medium, the data packet comprising computer executable instructions for performing the method of claim 33.
